

SMC CRAGG RAILCHARGER®

FEATURES & BENEFITS

- 20, 40, 60, 80 AMP
- Microprocessor controlled
- Operating temperature -40° C to 70° C
- Charges all lead acid and NiCad batteries
- Lightweight
- 20 x 20 OLED displays voltage, current, temperature and settings
- Ethernet connectivity allows for connection to remote monitoring systems
- AREMA compliant and California compliant (pending)
- < 1 volt peak to peak output ripple
- Meets AAR/AREMA specifications
- Hot swappable power modules allow units to be replaced without taking the charger off-line
- Integrated voltage monitor measures voltage of entire battery bank and provides alarming when voltage is outside of control limits
- Compatible with battery cell monitor to measure voltages of individual battery cells and provides alarming outside of control limits
- Two year warranty
