

RECO

SNOW DETECTION

RECO (Railway Equipment Company) has been manufacturing safe and reliable products for freight and transit railroads since 1980. We are dedicated solely to the railway business and no other.

While leading the charge in new innovative technology, we continue to improve our products in a constant effort to provide our customers with the very best.

RWY.COM

» FEATURES

- Point snow detector mounts in the web of the rail via magnet to detect blowing snow or snow dragged in by a train
- Operates reliably down to -40°F
- Standard pyramid style units mount on switch heater to detect falling snow
- Snow detectors are available in a wireless version and communicate back to the switch heater via radio
- System is complete with a weather tight enclosure, power supply, relay with timer, temperature control, and sensing heads with cords

» BENEFITS

- Compatible with all switch heater manufacturers with additional hardware (snow detector module)
- Inherent design prevents it from doming over and not activating
- Pyramid Detector has quick disconnect plugs allow the snow detector to be changed out if it is damaged without running a new cable

Detects blowing and drifting snow at the rail for improved switch clearing
