### » FEATURES

- 60 KW's of power equates to 200,000 BTU's
- Available in a variety of voltages: 240V, 480V or 575V powered
- 2HP and 3HP direct drive motors
- Complete electronic Control Module
- Dry contact or 24VDC indication circuit
- Operate remotely via dispatch, Ethernet connectivity or Snow Detect
- Microprocessor controlled allowing users to adjust
  - Run times
  - Air temperature set-points
  - Snow detection sensors
- High-efficiency air foil-type blower

### » BENEFITS

- Switch protection in the most adverse weather conditions providing the best defense against track switch malfunctions due to ice and snow when natural gas and propane are not available.
- Conserve energy with the use of high/low power output based on conditions
- Efficient design with built-in energy management
- Conserves resources
- Adjustable mounting foundations
- Programmed for on-demand use
- Advance controls allow for customization of operating parameters to reduce operating expense
- Remote monitoring and control capabilities via our proprietary Rail-NETTM software further increases the reliability and efficiency of your switch heaters without having to do a site visit.

RECO leads the industry in protecting switches from harsh winter conditions
