» FEATURES

- Available in a wide range of voltages
- Open fault detection to disable output upon heating element circuit failure
- Single ended elements with plugs for quick disconnect available in various lengths, wattages and voltages
- Each output now has three separate circuits so that one failure doesn't fail the whole system and to assist in trouble shooting
- Staggered start feature built with each output – stagger output startup to lessen the burden on the local electric grid
- Adjustable set point for temperature on start up
- Real time alerts and messages of fault messages for quicker trouble shooting on the unit
- Weather tight aluminum enclosure

» BENEFITS

- Up to 12 switches can be protected with one cabinet
- Units can be turned on locally by dispatch through a contact closure, by snow detection or Rail-NET®
- Many common sizes of heating elements ship from stock
- Compatible with Rail-NET® and other remote monitoring systems
- Enhanced design works with all 3 phase and single phase voltage supplies
