» FEATURES

- Modular design
- Available in 20, 40, 60 and 80 amp models
- 20 x 20 LED displays voltage, current, temperature & settings
- Fully automatic and convection cooled
- Operating temperature -40°C to 70°C
- Wall mounted or rack mounting kit
- Microprocessor controlled
- AC and DC circuit transient protection
- Automatic power up feature
- Battery string voltage monitor with relay output
- Programmable battery equalization and temperature compensation
- Adjustable current limit: 100-50%
- -/+ 1% voltage regulation
- 1 Form C programmable contact

» BENEFITS

- Integrated voltage monitor measures voltage of entire battery bank and provides alarming when voltage is outside of control limits
- Maximize the life of the charger by utilizing a Microprocessor to analyze and switch demand on the power module based on temperature
- Eliminates the risk of leaving utility power off after testing by utilizing the Automatic power up technology

Minimize installation time with
microprocessor and digital display
