» FEATURES

- High impedance connection between connection and battery monitoring cells
- Low/High voltage alarms provided via SNMP or contact closure
- Monitor amperage draw with optional current coil
- Capable of monitoring up to 15 battery cells
- Time to empty per battery string utilizing optional current coil

» BENEFITS

- Eliminates the potential fault of shorted wires
- Detect failing cells before it becomes an emergency by continuously monitoring voltage for up to 15 individual battery cells
- Increase efficiency and accuracy of inspections with the ability to easily download the voltage readings

» AVAILABLE OPTIONS

- Compatible with DTC and SMC chargers
- Standalone configuration

Improved emergency response utilizing
time to empty technology
